ANGEL GERARDO MOLINA VALDEZ

SDET | QA Automation Engineer

Mexico | angelgerardomolinavaldez@gmail.com

github.com/angel-valdezzz

01 PROFESSIONAL SUMMARY

SDET-oriented QA Automation Engineer with **5+ years of experience** designing and evolving automated testing solutions. Strong hands-on experience with **Python, Robot Framework, and Selenium**, specializing in test architecture, reusable QA tooling, parallel execution, reporting, and CI/CD integration.

70%
less regression execution time
From ~5 hours to 1.5 hours

30 → 5 min
test preparation
Automated Jira/Xray workflows

10-15
engineers/testers mentored
Recurring technical support

02 PROFESSIONAL EXPERIENCE

EPAM Neoris · Client: AXA

Feb 2021 - Present

Tester Sr · Jun 2025 - Present | **Tester Jr** · Sep 2021 - May 2025
Intern · Feb 2021 - Aug 2021

- Designed and evolved reusable test frameworks using **Python, Robot Framework, and Selenium**, supporting web automation across dozens of applications.
- Refactored tightly coupled solutions into modular architectures using **POM, Page Components, Keyword-Driven and Data-Driven Testing**, OOP, SOLID, and separation of concerns.
- Reduced a representative regression suite from **5 hours to 1.5 hours** through parallel execution, achieving an estimated **70% reduction**.
- Automated test creation, cloning, and execution setup in **Jira/Xray**, reducing a manual workflow from approximately **30 minutes to 5 minutes**.
- Built reusable tooling for execution, test data, evidence, and reporting; adapted these tools and environment preparation for **Azure DevOps CI/CD pipelines**.
- Engineered parallel and headless E2E execution with parameterized browser configuration and Python orchestration. Debugged Selenium synchronization, iframes, windows, scrolling, and interactions; mentored **10-15 engineers/testers**.

ANGEL G. MOLINA VALDEZ

TECHNOLOGIES, PROJECTS & EDUCATION

03 CORE SKILLS

Primary stack	Python · Robot Framework · Selenium · UI/E2E · Regression Automation
Test architecture	POM · Page Components · Keyword-Driven · Data-Driven Clean Architecture · SOLID · OOP · Design Patterns
Automation Engineering	Parallel execution · Framework development · Test data management Orchestration · Custom Python libraries · Robot Framework listeners / APIs
API Testing	REST APIs · HTTP · JSON · JSON Schema · JSONPath RequestsLibrary · Python requests
CI/CD & tooling	Git · GitHub Actions · Azure DevOps · Poetry Python packaging · Dependency management
Test management	Jira · Xray · Test preparation automation · Evidence management
Additional experience	Playwright · Cypress · pytest
Knowledge	Java · JavaScript · TypeScript · Docker fundamentals · Cucumber/Gherkin

04 SELECTED PROJECTS

Robot Framework Evidence Reporter

Python · Robot Framework · Test Reporting

Reusable evidence and reporting solution with structured execution steps, screenshots, metadata, HTML reporting, and PDF/Word generation through Robot Framework listeners.

Robot Framework Request Reporter

Python · Robot Framework · REST API Testing

API reporting for requests, responses, headers, bodies, status codes, and validations across multiple requests per test case. Includes packaging, documentation, GitHub Actions, and PyPI publishing.

Pytabify

Python · Data-Driven Testing

Transforms tabular test data into structured Python objects, improving maintainability and reuse in Data-Driven Testing workflows.

Independent web and API automation examples

Personal projects | Web and API testing

Independent repositories for ParaBank UI and Demo Users API, with browser and HTTP scenarios.
Python, Java, JS/TS, Robot Framework and experimental TestScript; verified in GitHub Actions.

05 EDUCATION & LANGUAGES

Bachelor's Degree in Computer Systems Engineering
Tecnológico Cuicalli · Sep 2017 - Sep 2020 · Completed

Spanish: Native | **English:** A2
Able to work with technical documentation, API references, libraries, error messages, and engineering resources.
